

The easiest way to find the NCWCP is to use the Kenilworth Ave Exit on the Beltway (MD 201, Exit 23) & head inside the Beltway to College Park. It's ~ 3 mi to the stoplight for River Rd, where you turn Right. It's another .3 mi to University Research Dr where you make another Right & go straight until you see a **cul-de-sac** (U Research Ct). Turn Left to get to the NCWCP gate.

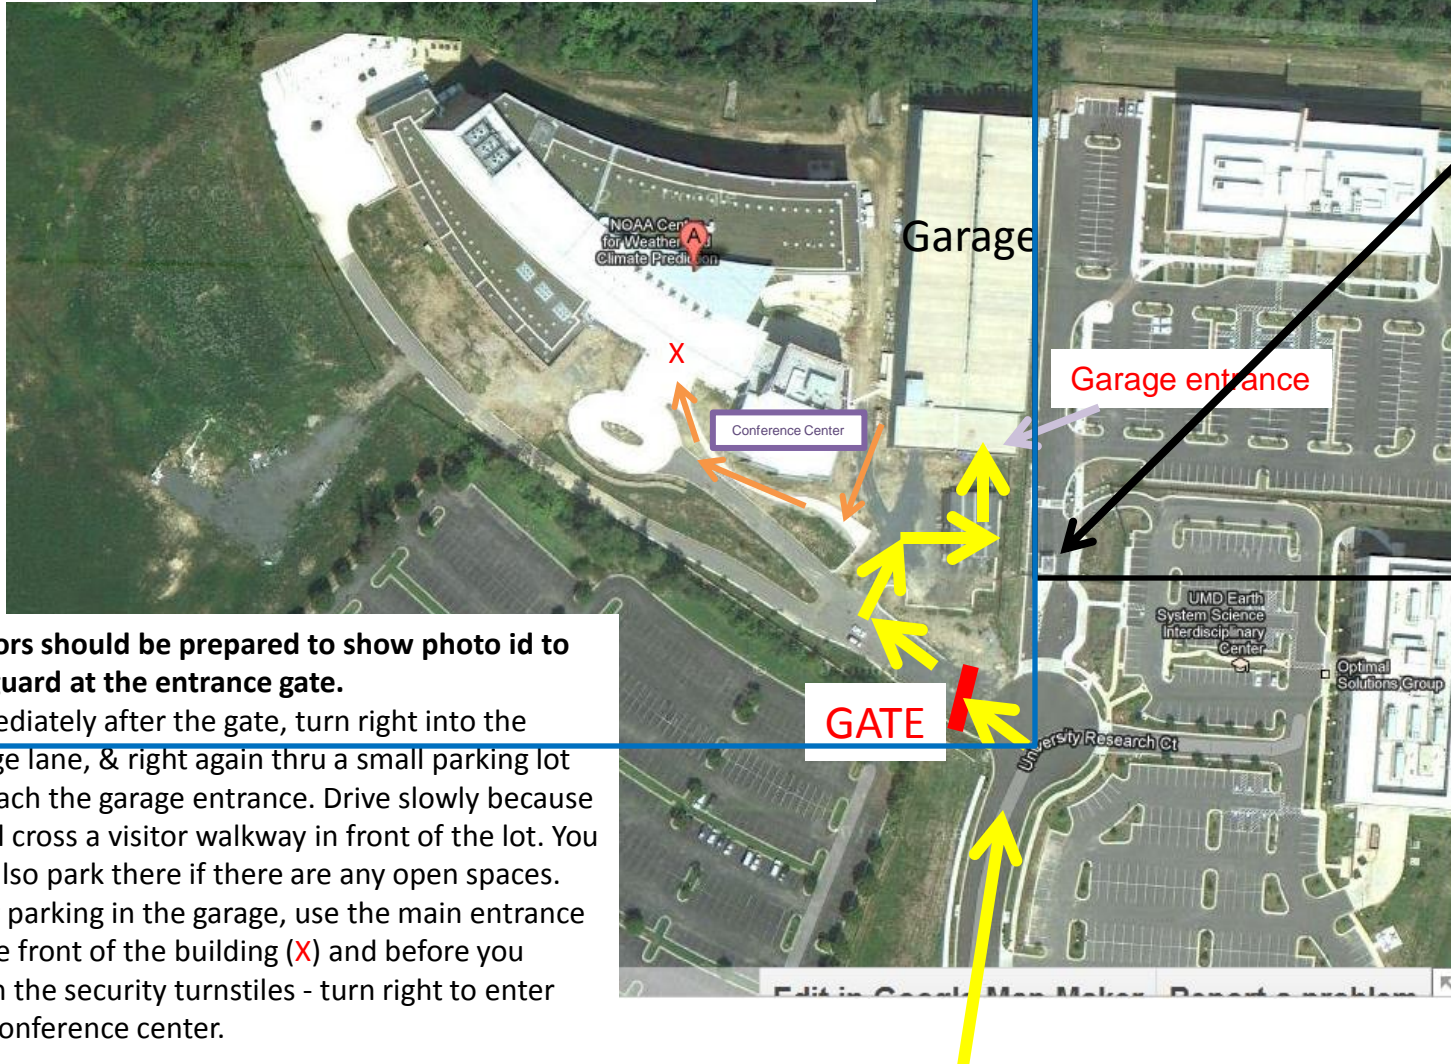

More info about the NCWCP can be found here:

<http://www.ncep.noaa.gov/ncwcp/>

Visitors who stay in one of the many motels along Hwy 1 can reach NCWCP by turning onto Paint Branch Parkway & turning Right onto River Rd near the College Park Metro stn. The Right turn onto U Research Dr is .8 mi along River Rd.

NOAA Center for Weather and Climate Prediction (NCWCP)
5830 University Research Court
College Park, MD 20740

Visitors should be prepared to show photo id to the guard at the entrance gate.

Immediately after the gate, turn right into the garage lane, & right again thru a small parking lot to reach the garage entrance. Drive slowly because you'll cross a visitor walkway in front of the lot. You can also park there if there are any open spaces. After parking in the garage, use the main entrance at the front of the building (X) and before you reach the security turnstiles - turn right to enter the conference center.

NSA facility where the guards get annoyed by people who drive straight ahead to their gate instead of turning Left to the NOAA gate.
